/Michael A Marcheschi/ Primary Examiner, Art Unit 1793

13. Other: \_\_\_\_\_.

Continuation of 3, NOTE: a new search and/or consideration is need in view of the amendment to the claims which narrow said claims

Continuation of 11, does NOT place the application in condition for allowance because: The argument based on rejection of Lyons will not be responded since the amendment change the scope of the claims and further consideration and search are needed. Regarding to rejection based on Bleakley and Johns:

The applicant argues that shape factor is not same as the aspect ratio. The Examiner respectfully subthedist as applicant discloses in Page 19 the shape factor is the ratio of diameter to the thickness. The Examiner respectfully submits that the definition of aspect ratio is the diameter to the thickness. The applicant failed to provide any factual evidence to show that the aspect and of the prior at will not meet the imitation of the instant application. The applicant's argument can not take the place of evidence. Furthermore, the method of measure the shape factor is not in the claims. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the method of measure the shape factor) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns. 988 F 2d 1181; 26 USPQ2d 1057 (Fed. Cir. 1993).
